

Waste Management Bylaw #A-764

Please be advised that according to Bylaw #A-764 all residents and businesses are required to place their bagged waste or bagged garbage in a proper garbage container or receptacle. A garbage container or receptacle under the bylaw means a metal, wood or plastic garbage container or receptacle with a secure lid to prevent the invasion of birds or animals. Should this bylaw not be adhered to you may be subject to a \$100.00 fine for the first offence and a \$200.00 fine for the second and subsequent offences.

Please ensure that when you place your garbage ready for pick-up that it is placed in a secure garbage container so that animals and birds cannot rip the bags open and drag the garbage everywhere.

The Village office has received complaints of such happenings of late.

ANIMAL CONTROL ISSUES: To all pet owners within the Village of Consort, please be advised that when walking our pets we need to remember to bring along doggie poop bags as these droppings are not pleasant for others to have to contend with. As well when walking our friendly animals please ensure that they are on a leash at all times. The Village does not provide dog runs at this time where animals are let loose to run.

VILLAGE OF CONSORT

The Village Council will be holding an open house on Tuesday March 18th, 2014 starting at 4PM in the Consort Community Hall to inform the ratepayers on the proposed projects for 2014 and to discuss how do we proceed to address the severe infrastructure deficiencies that we are facing in the coming years. Please watch the Consort Enterprise for future updates on the date for the meeting. Posters will be placed at the post office as well. We hope to see many of you there as this is very important.

RECYCLING: As many of you know our recycling area is in dire need of some major TLC. The Village has spoken with the people in charge and we are advising you that Big Country Waste Management Commission is in the process of taking over the direct management of the recycling program. Changes are coming so please have patience with the program as it will be under new management. Please see below excerpts from a press release from the Big Country Waste Management Commission:

Waste Transfer Stations Community Cooperation Requested

As most people are aware, disrespect by users of recycle facilities has been resulting in increased costs, damaged recyclables, and unsightly premises.

This includes the sites at the transfer stations set aside for large volume recyclables (metals, tires, fridges, etc.) as well as the bins located throughout the area for convenience for cardboard, paper, etc.

Many of the Commission Transfer Stations have undergone extensive clean up and reorganization these past few months and we are ready to make a new start.

The Commission is asking for the community's cooperation in maintaining clean and manageable sites.

Please consult with attendants for guidance with respect to location and types of materials.

Thank you in advance for your cooperation as we make positive changes in the way we do waste and recyclables
